SAFETY DATA SHEET

1. Identification

Product number	CP818
Product identifier	DUST OUT PREMIUM FURNITURE POLISH
Company information	ROYAL PAPER CORPORATION 10232 PALM DR. SANTA FE SPRINGS, CA 90670 United States
Company phone	General Assistance 562-903-9030
Emergency telephone US	1-866-836-8855
Emergency telephone outside US	1-952-852-4646
Version #	01
Recommended use	Not available.
Recommended restrictions	None known.
2. Hazard(s) identification	

2. Hazard(s) Identification

Physical hazards		
Health hazards		
Environmental hazards		
OSHA defined hazards		
Label elements		

Flammable aerosols Aspiration hazard Not classified. Not classified.

Signal word Danger Extremely flammable aerosol. May be fatal if swallowed and enters airways. Hazard statement Precautionary statement Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. Response Storage Store locked up. Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F. Dispose of contents/container in accordance with local/regional/national/international regulations. Disposal Hazard(s) not otherwise Static accumulating flammable liquid can become electrostatically charged even in bonded and classified (HNOC) grounded equipment. Sparks may ignite liquid and vapor. May cause flash fire or explosion. Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
Water		7732-18-5	60 - 80
Distillates (Petroleum), Hydrotreated Light		64742-47-8	10 - 20
Butane		106-97-8	2.5 - 10
Propane		74-98-6	2.5 - 10
White Mineral Oil		8042-47-5	2.5 - 10
Sorbitan Monooleate		1338-43-8	1 - 2.5
Fragrance		Proprietary	0.1 - 1

Chemical name	Common name and synonyms	CAS number	%
Oxazolidine E		7747-35-5	0.1 - 1
Polyoxyethylene (20) Sorbitan Monooleate		9005-65-6	0.1 - 1
Other components below reportable levels			0.1 - 1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures	
Inhalation	Move to fresh air. Get medical attention if symptoms persist.
Skin contact	Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.
Ingestion	Call a physician or poison control center immediately. Rinse mouth thoroughly. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.
Most important symptoms/effects, acute and delayed	Aspiration may cause pulmonary edema and pneumonitis. Direct contact with eyes may cause temporary irritation.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.
5. Fire-fighting measures	
Suitable extinguishing media	Alcohol resistant foam. Water fog. Dry chemicals. Carbon dioxide (CO2). Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. This product is a poor conductor of electricity and can become electrostatically charged. If sufficient charge is accumulated, ignition of flammable mixtures can occur. To reduce potential for static discharge, use proper bonding and grounding procedures. This liquid may accumulate static electricity when filling properly grounded containers. Static electricity accumulation may be significantly increased by the presence of small quantities of water or other contaminants. Material will float and may ignite on surface of water.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighters protective clothing will only provide limited protection.
Fire-fighting equipment/instructions	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Move containers from fire area if you can do so without risk. Cool containers exposed to heat with water spray and remove container, if no risk is involved. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out. Some of these materials, if spilled, may evaporate leaving a flammable residue.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.
General fire hazards	Extremely flammable aerosol.
6 Appidental release mag	

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Remove all possible sources of ignition in the surrounding area. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Use appropriate containment to avoid environmental contamination. Transfer by mechanical means such as vacuum truck to a salvage tank or other suitable container for recovery or safe disposal. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up	smoking, flares, sparks or flames away from spilled material. Stop le open area if the leak is irreparable Cover with plastic sheet to preven	ets and/or instructions for use. ELIMINATE all ignition sources (no n immediate area). Keep combustibles (wood, paper, oil, etc.) eak if you can do so without risk. Move the cylinder to a safe and . Use water spray to reduce vapors or divert vapor cloud drift. t spreading. Absorb in vermiculite, dry sand or earth and place waterways, sewer, basements or confined areas. area with water.
		ent material (e.g. cloth, fleece). Clean surface thoroughly to or waste disposal, see section 13 of the SDS. This material and as hazardous waste.
Environmental precautions	environmental releases. Prevent f	Inform appropriate managerial or supervisory personnel of all urther leakage or spillage if safe to do so. Avoid discharge into ground. Use appropriate containment to avoid environmental
7. Handling and storage		
Precautions for safe handling	accumulating liquids) or dangerou can promote accumulation of stati at high flow rates, splash filling, cr sampling, gauging, switch loading or burn, even after use. Do not us flame or any other incandescent r thoroughly dry. Do not cut, weld, s other sources of ignition. All equip re-use empty containers. Do not b in contact with eyes. Avoid prolon	and combustible materials (including combustible dust and static s reactions with incompatible materials. Handling operations that c charges include but are not limited to: mixing, filtering, pumping eating mists or sprays, tank and container filling, tank cleaning, vacuum truck operations. Pressurized container: Do not pierce if spray button is missing or defective. Do not spray on a naked naterial. Do not smoke while using or until sprayed surface is older, drill, grind, or expose containers to heat, flame, sparks, or ment used when handling the product must be grounded. Do not reathe dust/fume/gas/mist/vapors/spray. Do not get this material ged or repeated contact with skin. Use only in well-ventilated protective equipment. Wash hands thoroughly after handling. Observe
	Code in Canada, (CSA C22.1), or 2003, "Protection Against Ignition	oment bonding and grounding, refer to the Canadian Electrical the American Petroleum Institute (API) Recommended Practice & Arising out of Static, Lightning, and Stray Currents" or National .) 77, "Recommended Practice on Static Electricity" or National .) 70, "National Electrical Code".
Conditions for safe storage,	Level 1 Aerosol.	
including any incompatibilities	exceeding 50°C/122 °F. The pres heat. Do not puncture, incinerate other sources of ignition. This mat become an ignition source. Avoid alone may be insufficient to remov	ainer. Protect from sunlight and do not expose to temperatures sure in sealed containers can increase under the influence of or crush. Do not handle or store near an open flame, heat or erial can accumulate static charge which may cause spark and spark promoters. Ground/bond container and equipment. These e static electricity. Store in a well-ventilated place. Refrigeration accompatible materials (see Section 10 of the SDS). Level 1
8. Exposure controls/pers	onal protection	
Occupational exposure limits		
US. OSHA Table Z-1 Limits f Components	or Air Contaminants (29 CFR 191 Type	0.1000) Value
Propane (CAS 74-98-6)	PEL	1800 mg/m3

Propane (CAS 74-98-6)	PEL	1800 mg/m3	
		1000 ppm	
US. ACGIH Threshold Limit Value			
Components	Туре	Value	
Butane (CAS 106-97-8)	STEL	1000 ppm	
US. NIOSH: Pocket Guide to Che	mical Hazards		
Components	Туре	Value	
Butane (CAS 106-97-8)	TWA	1900 mg/m3	
		800 ppm	
Propane (CAS 74-98-6)	TWA	1800 mg/m3	
		1000 ppm	

Biological limit values	No biological exposure limits noted for the ingredient(s).	
Appropriate engineering controls	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation or other engineering controls to maintain airborne levels below recommended exposure limits. I exposure limits have not been established, maintain airborne levels to an acceptable level.	
Individual protection measures,	such as personal protective equipment	
Eye/face protection	Wear tight-fitting goggles or face shield. Face shield is recommended. Wear safety glasses with side shields (or goggles).	
Hand protection	Wear appropriate chemical resistant gloves.	
Skin protection		
Other	Wear suitable protective clothing.	
Respiratory protection	If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.	
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.	
General hygiene considerations	Do not get in eyes. When using do not smoke. Avoid contact with skin. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Risk of ignition.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Heat, flames and sparks. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents. Nitrates. Fluorine. Chlorine.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Ingestion	Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.
Inhalation	Not available.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Direct contact with eyes may cause temporary irritation.
Symptoms related to the physical, chemical and toxicological characteristics	Aspiration may cause pulmonary edema and pneumonitis. Direct contact with eyes may cause temporary irritation.

Information on toxicological effects
